30 June 2022

Message from the Guest Editors

Although policies and guidelines have been developed to guide organisations' sustainable procurement practices, the implementation of the policies and guidelines remains problematic in practice. Sustainable procurement involves a high degree of collaboration and engagement between all parties in a supply chain. It is therefore critical to enhance the traceability and transparency of supply chain management and help to reinforce the path towards the UN's Sustainable Development Goals, setting new industry standards in sustainable practices.

This Special Issue seeks to respond to the challenges and opportunities for sustainable procurement in various sectors and explore theoretical and practical solutions for integration of sustainability into organisations' procurement systems and supply network. We intend to cover all areas of sustainable procurement and provide a multidisciplinary perspective on challenges and opportunities, theories, practices and developments in this area. Original research, case studies and reviews are welcome to this Special Issue.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer-reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits
